

## How to Make a Model Woolly Mammoth

### You will need

Plastic milk bottle (2 litre size, emptied and cleaned)  
Scissors  
PVA glue  
Brown tissue paper  
Brown card  
White pipe cleaner  
Googly eyes

### What to do

1. Cut the top half of the milk bottle, just below the handle, and throw away the bottom half. Be careful to leave on the handle, as this will become the trunk.
2. Cut an arch into each of the bottom two sides to form the shapes of the legs (see fig 1).
3. Cover it all over with PVA glue and brown tissue paper. You can leave some bits of tissue paper sticking out to make a woolly effect. You may wish to stick on extra pieces of brown paper with frayed edges to look like hair.
4. Cut some ears out of brown card and stick them on.
5. Add some googly eyes and some pipe cleaner tusks.

## Year 3 Homework

Date set: Friday 5<sup>th</sup> October 2018

Date due in: Friday 19<sup>th</sup> October 2018.

In English lessons we have been writing instructions based on the story 'How to wash a woolly mammoth'. We would like the children to follow these instructions and make a model woolly mammoth out of a plastic milk bottle and accompany it with written instructions (a poster) using all the features of instructional texts that they have been taught.

You can decorate it with paint, paper or any other craft material. We have a collection of empty plastic bottles so please ask if you would like one to get started with.
