

Let's be pattern detectives!

Can you create a pattern outside?

Notes for parents or teachers

This week we are looking at pattern language. The key words we will be using are **matching, pattern, first, next, last, the same, different, repeat, colour, shape.** Make repeating patterns with toys, food or natural objects found outside.

Can you continue a pattern started by someone else?

Can you copy their pattern somewhere else?

Can you create the same pattern with different objects?

You could invent a letter or number code to represent your pattern.
